Awesome, you've been using Contact Form CFDB7 for more than 1 week. May we ask you to give it a 5-star rating on WordPress? | Ok, you deserved it | I already did | No, not good enough

WP SMTP connection error ⊗

Seems like there are some problems with the enterd information. Please re-check & re-enter it and hit the "Save changes" button.

We recently made some changes regarding how we save the username and password in the database, namely we are encrypting them, so that might be the reason for the connection error. Re-entering and saving them should solve the issue.

We made a few tweaks to the plugin, Opt in to make "Yet Another Stars Rating" better! ✖ Dismiss
